

Essential III Phono

"Smartly styled over-performer"

- One **big advantage** the Essential III Phono has, however, is **excellent feet**. These keep the playing surface isolated from the outside world.
- In sound quality terms, the Essential III Phono is the **most consistent** performer here. It has enough **bounce and energy** to engage you and draw you in. Vocals sound **rich, detailed, and lifelike** and, there's respectable **bass energy** too.
- The Pro-Ject has **excellent pitch stability**.
- It absolutely nails the **timing and drive** of the music. It **places vocals beautifully** into the overall mix – they **sound clear** but never detached from the song as a whole.
- A very convincing display of **what vinyl is capable of**.
