

# X1

**"The X1 is one of the top offers in the league"**

- In the case of the X1, this means a rock **solid MDF chassis** without unnecessary hollow spaces, which counteracts an unclear "boxy sound"
- The supplied, transparent conductor has definitely **audiophile qualities** in that it allows a more **relaxed, spatial and homogeneous reproduction**. The cable thus forms the successful end piece of the ambitiously made X1.
- The new X1 was no exception, it showed what you get for the money, **sounded lively, accurate, well organized and clean**.
- The Austrian **sorted the details so neatly** and placed the percussion that sounded as coming in from the next door room **so clearly** to the back right.
