

Phono Box S2 Ultra

„Intoxicating and intensive“

From the outside it looks identical with the legendary Phono Box S2, the Ultra version costs 100 euros more - but **internally it is also a completely different device.**

The dynamic gain compared to the Phono Box S2 is shocking. The ultra-small box can be recognized as a "smaller", spatially somewhat narrower and somewhat reserved design due to the extreme frequencies, but within its area of competence it has an unbelievable **directness and openness.**

Considered emotionally, one of the most rousing, intensive preamplifiers of this test - regardless of price!
