

MaiA S2

10.2020

The MaiA S2 gets a „Recommended“ from this channel!

I was quite impressed with the overall sound...

The MaiA S2 has very good instrument separation and leading edges of notes are very well defined.

...a cracking amplifier at this pricepoint.

In terms of high frequencies again, I'd have to give it to the MaiA S2.

...tonality and refinement are way above what you'd expect from an amplifier at this pricepoint.

There's no doubt that you could build a very nice system around this amplifier...
