

## Ground-it E

11.2021

**"I highly recommend it"**

**Watch the Video**

- The Ground-it **infused the midrange with air and space.**
- It also **added tonal balance** in terms of balancing the bass and upper frequencies.
- The bottom line was **confidantly neutral in the sonic presentation.**
- It was notable how much the **instruments appeared to spread out and find room for themselves to perform at their best.**
- I like this a lot and I **highly recommend it.**  
**Thumbs up!**
